Clinical Architecture

m y s o l m e d

A visual philosophy for the MySolMed identity

- 01

Clinical Architecture is the visual conviction that trust is built from precision, and that care is communicated through restraint. The brand mark must feel like an instrument calibrated by hand – not a decoration, but a tool. Every line exists because it solves a problem; every gap exists because silence is part of the signal.
- 02

The visual world draws from the intersection of medical instrument panels, Swiss architectural drafting, and the quiet authority of clinical typography. Forms lean toward the geometric – circles, hexagons, axes, hairline grids – but they are never cold. Cool is the failure mode of clinical design; what we seek instead is composed warmth.
- 03

Color operates as a single sustained note: a deep clinical navy as the structural foundation (trust, gravity, contract-grade authority), accented by a single thread of either pulse-cyan (vital, alive, electric) or sol-amber (light, solution, dawn). Two colors, no more. The accent never raises its voice; it appears once, deliberately.
- 04

Typography lives at the threshold of engineering and editorial. Wordmarks favor condensed grotesques or technical monospaces – fonts that read like specifications, not slogans. The lowercase treatment mysolmed is preferred to capitals because it lowers the voice: confident institutions do not shout.
- 05

Composition follows the law of the single anchor: one primary form, one accent, one wordmark, one generous field of negative space. The final mark must feel like it could be etched onto glass lobby walls, stitched onto a hospital coat cuff, embedded in a software splash screen – and in every context, look like it belongs.

Clinical Architecture — 6 Concepts

mysolmed

Original detailed marks: grids, ticks, dual rings, taglines.

MySolMed — Logo Concepts · Clinical Architecture

MY SOLUTION MED

01 · Pulse Monogram · M + ECG pulse line

02 · Sol Cross · Medical cross + solar rays

03 · Hex Shield · Hexagon + M monogram

04 · Solution Blocks · S/M modular assembly

05 · Axis Mark · Architectural axes + M

06 · Vital Wave · ECG waveform + wordmark

Design philosophy: Clinical Architecture · pick a number, refine next

Six concepts with full clinical detailing. Best for studying the design system before stripping down.

Reduced Marks — 6 Concepts

mysolmed

Strip the grid, ticks, and taglines. Mark + wordmark only.

MySolMed — Minimal Variants

M1 · Pulse · M + ECG spike

M2 · Sol Cross · Cross + 4 rays

M3 · Hex · Hexagon + M

M4 · SM Blocks · S + M geometric

M5 · Ring · Single ring + M

M6 · Wave · ECG + wordmark

Same six directions, minus decoration. More negative space, more logo-band feel.

Essential Marks — 8 Concepts

m y s o l m e d

Each mark is at most 3 visual primitives. Pure wordmark included.

MySolMed — Ultra-Minimal Variants

U1 · Dot Pulse · Navy dot + cyan accent dot

m y s o l m e d

U2 · M Stroke · Single-line M

m y s o l m e d

U3 · Crosshair · Ring + interior cross

m y s o l m e d

U4 · Dot Matrix · 5 dots forming M

m y s o l m e d

U5 · Arc + Dot · Open arc + cyan dot

m y s o l m e d

U6 · Pure Wordmark · Typography only

m y s o l m e d .

U7 · Square Cross · Navy square + cyan cross

m y s o l m e d

U8 · M Alone · Single 'm' letter

m y s o l m e d

Pushed to the edge of restraint. Where Swiss design meets clinical instrument.

Concept Decodings

m y s o l m e d

Each concept is a different reading of mysolmed – Solution, Solid, Soul, Solar, Solo, Sole.

ID	NAME	READING	NARRATIVE	FIT
C1	Pulse Monogram	System pulse	M + ECG line: tech-bone, life-core	SaaS splash
C2	Sol Cross	Solar care	Cross + sun rays: warmth meets authority	Internet hospital
C3	Hex Shield	Architectural core	Hexagon + M: enterprise shield	B2B contracts
C4	Solution Blocks	Modular system	S+M blocks: plug-and-play architecture	Data platform
C5	Axis Mark	Clinical precision	Axes + M: coordinate-system medicine	LIS/PACS
C6	Vital Wave	Living signal	ECG waveform + wordmark	App launch
– MINIMAL EDITION –				
M1	Pulse (min)	Single pulse	Just M + one ECG spike	Logo lockup
M2	Sol Cross (min)	Compass of care	Cross + 4 rays only	Sub-mark
M3	Hex (min)	Pure shield	One hexagon + M	Letterhead
M4	SM Blocks (min)	Solution pair	S+M geometric	DevOps tool
M5	Axis (min)	Ring of focus	Single ring + M	Footer
M6	Wave (min)	Quiet signal	ECG + wordmark only	Splash
– ULTRA-MINIMAL EDITION –				
U1	Dot Pulse	Pulse in the system	Navy dot + cyan accent	App icon
U2	M Stroke	One-line solution	Single continuous M	Editorial
U3	Crosshair	Precision located	Ring + interior cross	Lab/Imaging
U4	Dot Matrix	Data-driven	5 dots forming M	Data ops
U5	Arc + Dot	Open & ongoing	Open arc + cyan dot	Chronic care
U6	Pure Wordmark	Name as promise	Typography only + terminal dot	Universal
U7	Square Cross	Bounded care	Square + interior cross	Compliance
U8	M Alone	Root letter	Single 'm' + accent dot	Content brand

Direction & Next Steps

mysolmed

Three directions worth deepening, each carrying a different brand claim.

R1	U6 · Pure Wordmark CROSS - SCENE UNIVERSAL BRAND Like IBM / Sony / Google – the name IS the brand. Maximum versatility across contracts, splash screens, footers, app icons. Lowest risk, highest longevity. FIT – Best if you want a brand that ages well and never feels dated.
R2	U7 · Square Cross ENTERPRISE + COMPLIANCE Box = boundary, cross = medicine. Speaks directly to the regulated nature of medical B2B. Swiss design feel that holds up on contract headers, audit reports, and procurement decks. FIT – Best if your buyers are hospital CIOs, government health bureaus, or insurance partners.
R3	U5 · Arc + Dot HUMAN - CENTERED CARE Open arc = ongoing journey; cyan dot = pulse. Most narrative depth. Positions mysolmed as a long-term companion, not a transactional vendor. FIT – Best if your focus is chronic care, primary care, family doctors, or patient-centric SaaS.

NEXT STEPS

1. Pick ONE direction (or tell me a different angle you want to push).
2. I'll deliver 3-4 variants: pure-icon, pure-wordmark, reverse (dark bg), favicon, app icon.
3. Output as SVG (vector, print-ready) + PNG + favicon set.
4. Optional: business card / PPT cover / web header mockups.
